## SOME TECHNOLOGIES USED:

Material Design v7 w/ Material Colours

Recycler View / Card View

Location Manager

Shared Preferences

Volley / Picasso Libraries

Google Maps API

MySQL Database

PhpMYadmin

PHP

## HOW IT WORKS:

*You can either register or use the app as a guest, to add a restaurant to your favourites, you will have to register with us.*

*After this, you either have the choice to automatically locate your postcode (using your location permissions), or enter the postcode manually*

*If there is a restaurant near you (currently we only have 10 restaurants, all located in Uxbridge), you will proceed to select the filter options that are near you.*

*After you select a particular filter option, the app will show you the restaurants offering that particular filter option.*

*By choosing a restaurant from this page you can visit that particular restaurant page.*

*In the restaurant's page you can find it's menu, review it, add it to your favourites\*, find its location\*\**

*At any point after the welcome screen, you can use the Bar on the left hand of the screen (by touching the bar option from the top-left side of the Title Bar)*

*Through the bar, you can see what restaurants you have added as your favourites, go to the settings, help and the about us page, you can also logout of your account from here.*

## Happy Filtering!

*\*Only if you have logged in*

*\*\*Full Functionality not added yet*
